AG-P5533	E27	5W	2700K/3000K/4000K	100-270V	≥80	Concrete+Aluminium

Company Introduction

A & A Global Resources Pvt Ltd more popularly known as "A & A" or "Agate and Agate" was established in 1993 by its founder Ashutosh Agate, a qualified Electronics engineer with the previous experience in the sales of Capital Equipment.

Since its inception, A & A engaged itself in "Sales & Service" of specialized products used by Electronics Hardware Industries. Service Mount Technology (SMT) has been its focus area while building its business across India

Sensing the growing need for Low volume, High mix as well as High volume PCB Assembly equipment in India, it entered into Sales & Service agreements with reputed manufacturers of such equipment from Europe & the Far East Countries.

In order to maintain the competitive edge in the market, it also chose to outsource some of the low value peripheral SMT Equipment from China & sold those under its own brand with complete responsibility of after sales services & spare parts.

Recently, A & A has included machines & peripherals that aid Industry 4.0, traceability, and promote process quality and process efficiency.

With its formidable track record in the Sales & Service of SMT products it has become the dependable partner for its vast customer base throughout India.

To ensure each of our products has better quality, we choose excellent and stable suppliers for parts, LED chips and drivers.

Our product features

Environment friendly

Good lighting products should bring brightness to human beings, be safety and healthy. We use plaster and concrete to make lighting products, derived from environmental properties of the materials themselves, so every product that we get along is absolutely safe.

Energy saving

With maturity of LED technology, we combine the product structure with LED technology to make every lighting fixture produce the best effects.

Innovation

We make every product as a work of art, all hand-crafted products. Each product has been carefully crafted through 56 manual processes, from mining of ore to complete lighting products, include efforts of workers, designers, engineers, sales and managers, etc. We look forward to your feedback of using experience.
